# The WAVE Plus System

Wireless Sensors such as Panic Buttons Communicate with the Wireless Receiver in the WAVE Plus Control Panel
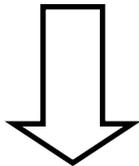

**WAVE Plus Control Panel Communicates with Output Devices**

**Broadcasts Alarms Over Up to Four Radio Networks**

Communicates with an SMTP Server which then sends Emails and Text Messages
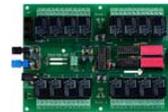

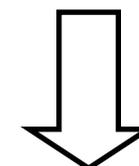

**Transmits Alarms over PA and Speaker Systems or Turns on Strobe Lights**

Sends Messages to Phones via a POTS Line

Triggers Other Security or Digital Signage Systems via Serial Data

Triggers Relays to Control Other Devices

Emails and Text Messages are Received on Smart Phones and Computers
